ASNT SOUTHWESTERN ONTARIO SECTION

Invites you to attend their meeting

Date: Thursday, February 22nd, 2018

Time: 6:00 – 7:30 PM

Location: Canadian Welding Bureau, 8260 Parkhill Drive, Milton, Ontario

This is a free event with light refreshments included!

Topic: Retained Austenite Measurement & Magnetic Response to 17-4PH Stainless Steel under Magnetic Particle Testing

Speaker: Marius Saiciuc (Bachelor Degree – Metallurgical Engineering & Materials Science from Polytechnic University Bucharest)

Your ASNT Southwestern Ontario Section is pleased to invite you to participate in a discussion that is backed by years of experimental work. Marius has compiled a wealth of material while researching the behaviour of retained/reverted Austenite and its interesting role in Magnetic Particle Examination of steel. If you are at the forefront of the Non-Destructive Community or a technician with the ambition to further your knowledge of the science of the field, then this is a discussion that you won’t want to miss.

Marius has over 25 years of extensive Metallurgical experience as a Heat Treat Process Engineer for a large automotive components manufacturer and currently as a Process Metallurgist at a leader in the manufacturing of Quality Forgings throughout the industry. Marius has lead and participated in countless process/material improvements and failure analysis investigations over his career.

Everyone is welcome, so please pass this message along to your NDT colleagues.

Please RSVP with number of attendees, to help organize the event.

Look forward to seeing you all on the 22nd February at 6:00 PM!

Our goal is to serve and collaborate with the NDT Industry & its Professionals to create a Safe Community!

Registration: RSVP, send Email confirming your attendance to:

Parvin Sidhu (Chairperson); Terry Burt (Director); asntswontario@gmail.com or by Cell: (519) 239-7681.
